## NEW CTEK CT5 POWERSPORT 12V BATTERY CHARGER KIT

Make sure you're ready for action with the easy-to-operate CTEK CT5 Powersport battery charger and maintainer. Designed specifically for demanding 5-25 Ah lead-acid and twelve-volt lithium batteries (LiFePO4, Li-Fe, Li-iron, LFP), the unit features three fully automatic charging and maintenance programs. Normal is for all lead-acid batteries, including Absorbent Glass Mat (AGM). As the name suggests, the Lithium program is for charging lithium batteries. The Reconditioning program will be familiar to long-time users of CTEK products. Essentially, it's used to recondition a battery and, in some instances, will return a seemingly dead battery back to good health. Even when a battery is in perfect working order, the CT5 Powersport can be left connected indefinitely, allowing the battery to maintain its level of charge — this excellent CTEK product will never over- or under-charge, making it the ideal unit to take care of battery maintenance for owners of vehicles using powerful compact batteries, not limited to motorcycles, jet skis, scooters, snowmobiles, golf carts and buggies.

**Price: £85.99**

## DESIGN 911 DOUBLE DUTCH CRAFT PILS BEER

Independent Porsche parts retailer, Design 911, is rolling out a special treat for its Dutch trade customers. For a limited time, every order equal to or exceeding five hundred euros will come with a complimentary four cans of Double Dutch, a new and exclusive craft pils developed by Design 911 in partnership with Rotterdam-based brewery, Kaapse Brouwers. Floral, smooth and refreshing, the drink contains 4.6% alcohol and is typical of the bold recipes Kaapse is famous for. The company has long experimented with different flavours, creating contemporary craft beers from its fully independent brewery in the iconic Keiledistrict in Rotterdam West. Thirsty? Contact Design 911 for further details.

**Price: Free when spending €500**

## RENNLINE 996 CARBON CENTRE CONSOLE TRIM

Rennline's carbon-fibre center console covers are a great way to give your 996-generation 911's interior a subtle modern upgrade. The original covers are high-wear items and don't hold up well over time. In contrast, these high-quality carbon-fibre replacement parts are highly durable and resistant to common wear and tear. They're a direct swap for standard centre console covers and promise a factory fit with added style. Produced using the latest carbon-fibre manufacturing techniques, the covers are sold as a pair and can be ordered direct from the Rennline website, where you will also find a 996 centre console delete kit constructed from lightweight weave. In fact, Rennline has recently updated its list of carbon components for the 996 — the company's catalogue now includes a 996 arm rest, door pull handles and the just-mentioned centre console delete kit, all constructed from carbon-fibre. These parts are also suitable for installation in a 986 Boxster. Non-carbon 996 items in the brand's revised portfolio of products include three-point safety harnesses, a manual shift boot and bumper grilles.

**Price: \$276.25 per pair**
