

Car crime is on the rise

According to the Office for National Statistics, the number of cars stolen soared by 29% between September 2021 and the same month in 2022, with more than 72,000 vehicles reported stolen. Additionally, the figures revealed a 14% rise in vehicle crime, reaching 391,613 cases, which includes theft of items from inside cars and vans.

Stoplock, the leading vehicle security brand in the UK, is well-known for its reliable anti-theft devices. The brand's reputation has been built on the high quality and performance of its products, including the popular steering wheel locks, wheel clamps, van locks, and motorcycle locks.

Distributed by Saxon, the Stoplock range includes one of the steering wheel locks trusted and recommended by the police to prevent vehicle theft. A steering wheel lock serves as a powerful physical and visual deterrent, often discouraging criminals from even attempting to steal the car. Investing in a reliable steering wheel lock like the Stoplock Pro is a small price to pay for the peace of mind that comes with knowing your car is secure.

The full range with references is below:
